

Invitation to Host

For Directors, By Directors

Would your community like to host a networking event for directors?

CondoSTRENGTH helps condominium directors build comradery at networking events hosted by local condo communities, at which directors can come together, meet and share experiences.

Success stories kept in the program's on-line resource toolkit and other common challenges can be discussed as condominium directors from various local condominium communities have the opportunity to learn from one another.

We are asking interested condominium communities to offer meeting space for these networking events to allow the program to be offered at no charge and to provide their communities with greater access to the program's resources. We will help with planning!

If you would like your condominium to consider hosting a future networking event, please:

- Assess if you have appropriate meeting space that could be available for use and consider when may be the best time of day to host an event in your community.
- Arrange for your Board of Directors to consider offering to host a program networking event at a duly constituted Board meeting (this could be added to the meeting's agenda)
- Document your Board authorizing (at a Board meeting) the use of your condo's facilities for a CondoSTRENGTH networking event on a mutually agreeable time/date and select a representative of your community to act as a primary contact in scheduling this. Authorization could be recorded in meeting minutes.
- Contact your local chapter to CCI to share your interest in hosting a networking event.

We appreciate your support!

While all expressed interest is appreciated, we are looking to schedule these events in different areas throughout the chapter's service boundary and request that interest in hosting please only be expressed after such has been authorized by your Board.
